Valley Oak Arabians Bam Brentwood CA.

The firm is known for servicing the "Heck" out of its clients by communicating openly, maintaining realistic budgeting, and providing efficient planning, thoughtful contextual design and precise detailing. This focus on service above and beyond the actual design-and-drafting tasks has led to a significant amount of repeat business and referrals.

Stirling Architects' projects include private custom residences, remodels, production homes, planning residential communities, churches, restaurants, tenant improvements, retail establishments, veterinary hospitals, wineries, theaters, land planning and large scale developments. Its projects are mostly in California and range from locations throughout the San Francisco Bay Area to Palm Springs and the San Joaquin Valley. Some of its clients include Shea Homes, Suncrest Homes, Discovery Builders, Baskin-Robbins, Nations Restaurants, Corners tone Fellowship, Sansome Pacific Properties, the East Contra Costa County Historical Society, and Tamayo Vineyards.

Stirling Architects' founder, Don Stirling, has thrown himself into the community. He has served on the Planning Commission for the City of Brentwood since 2005. He is active in the Brentwood Rotary Club. Don also serves on the board of Directors for the John Marsh Historical Trust. »

Don Stirling, AIA, is the principal architect of the firm of Stirling Architects, which he founded in Brentwood, California in 2005. Stirling Architects has a staff of five people who work closely together. Stirling, who earned a Bachelor of Architecture from California Polytechnic State University, San Luis Obispo, brings 17 years of commercial and residential architectural experience to the leadership of his team.

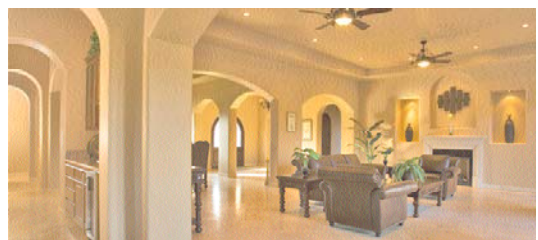

Stirling Architects believes strongly in listening closely to its clients to help them achieve their visions. It applies imagination and creativity in tailoring every project to the specific needs of each client the firm is serving. The company's logo represents its commitment to both going above and beyond and thinking outside the box through all phases of our clients' projects.
